Philosophy of Science for Nursing Practice: Concepts and Application

Tailored for both DNP and PhD doctoral nursing programs, this text is the first to focus on philosophy of science applications to the discipline of nursing. The authors, a philosopher and a nurse-scholar who co-teach the course upon which this volume is based, address a growing need for increased philosophy of science content in evolving DNP programs, as well as practice-oriented research considerations for this discipline.

The volume presents a creative use of the social, political, and historical content in which nursing has evolved. As a whole, this extremely important text reassures the student of the fluid and palpable connections between philosophy of science and nursing science and practice.

Publication Year: 2010
Edition: 1
Author/Editor: Dahnke, Michael D.; Dreher, H. Michael
Publisher: Springer Publishing Company
ISBN: 978-0-826-10554-7
Doody's Star Rating®: ★★★★★ Score: 97
