Cardiovascular Disease in the Elderly provides user-friendly advice in a field that has limited evidence but contributes significantly to the workload not only of cardiologists but also of elderly care physicians and general practitioners.

It reflects current UK and international guidelines and provides key evidence based references. Wherever possible, published guidelines are incorporated to ensure the book reflects current recommended management. It indicates where practice differs from that of younger adults, and provides guidance on the ethical and clinical dilemmas particular to the elderly. The handbook covers many aspects of cardiovascular disease in the elderly and focuses on common problems, including heart failure, atrial fibrillation and isolated systolic hypertension.

Publication Year: 2011
Edition: 1st
Author/Editor: Gray, Rosaire; Pack, Louise
Publisher: Oxford University Press (OUP)
Doody's Star Rating®: ★★★★★ Score: 94
Platform: Ovid
