A classic nursing reference, the fully updated

Authoritative yet easy to follow, this comprehensive text guides you through the nursing concepts and skills particularly vital for medical-surgical assessment, care, and treatment. Essential for both in-the-classroom and on-the-unit guidance, this is the expertise that all students, new nurses, and medical-surgical nurses need to grasp essential nursing concepts, care management, and procedures.

Discover the insights and data that every nurse needs:

**NEW and updated features**
- Nursing, Gerontologic, Drug, and Transitional Care Alerts, evidence-based references, diagnostic methods, and drug treatment throughout the book

**Easy-to-read, well-illustrated outline format**
- practical, pertinent, and comprehensive content for the busy nurse, including:

- **Patient education**
  - essential self-care, prevention, and health promotion information

- **Nursing assessments**
  - important signs and symptoms and other clinical data to be on the alert for in all types of conditions

- **Body system terminology**
  - how anatomy and physiology are affected by disease in each body system

- **Equipment use**
  - utilizing technology for patient monitoring and therapy

- **Nursing process and practice**
  - systematic use of the nursing process for assessment, planning, and intervention

- **Emergency nursing**
  - emergent conditions

- **Psychiatric Nursing**
  - mental health problems

- **Medical-surgical nursing**
  - adult physical assessment, IV therapy, perioperative nursing, cancer nursing, and care of the older or disabled adult

- **Patient care by body system**
  - functions, problems, disorders, and therapies described for the respiratory, cardiovascular, neurologic and sensory, gastrointestinal, renal, genitourinary, reproductive, metabolic, endocrine, hematologic, immunologic, musculoskeletal, and integumentary systems

- **Maternity and neonatal nursing**
  - maternal and fetal health, nursing management during labor and delivery, care of mother and neonate in postpartum period, and complications of childbearing

- **Pediatric nursing**
  - pediatric growth and development, physical assessment, primary care, treatment of pediatric disorders of all body systems, and developmental disabilities
