Decision Making in Emergency Critical Care: An Evidence-Based Handbook

This guide to rational clinical decision-making in the challenging - and changing - world of emergency critical care provides in every chapter a streamlined review of a common problem in critical care medicine, along with evidence-based guidelines and summary tables of landmark literature.

Features:
- Prepare for effective critical care practice in the emergency room’s often chaotic and resource-limited environment with expert guidance from fellows and attending physicians in the fields of emergency medicine, pulmonary and critical care medicine, cardiology, gastroenterology, and neurocritical care.
- Master critical care fundamentals as experts guide you through the initial resuscitation and the continued management of critical care patients during their first 24 hours of intensive care.
- Confidently make sustained, data-driven decisions for the critically ill patient using expert information on everything from hemodynamic monitoring and critical care ultrasonography to sepsis and septic shock to the ED-ICU transfer of care.

Publication Year: 2014  
Edition: 1st Ed.  
Author/Editor: Arbo, John E.; Ruoss, Stephen J.; Lighthall, Geoffrey K.; Jones, Michael P.  
Publisher: Lippincott Williams & Wilkins (LWW)
