The selected high quality manuscripts should provide relevant and detailed information that will be useful to experienced and novice surgeons with an interest in reduction mammoplasty.

The Clinical Masters Series of Plastic and Reconstructive Surgery has been designed to provide the readership with a compilation of informative and instructive manuscripts related to various topics. Within the breast series is a comprehensive section on reduction mammoplasty. There are a plethora of manuscripts on this topic describing various techniques for reduction mammoplasty, all of which have demonstrated success under specific circumstances.
