Neoplastic Lesions of the Skin

Presents the full gamut of key inflamed skin disorders entities and diagnoses that a pathologist can expect to encounter in daily practice.

Coverage includes inflammatory reactions limited to the epidermis, inflammatory reactions of the dermis, inflammatory reactions of subcutaneous tissue, infectious diseases, cutaneous and metabolic disorders and more. Neoplastic Lesions of the Skin is highly illustrated throughout and provides a handy summary and quick reference guide for pathology residents and less experienced pathologists. In addition, it serves as a portable “refresher course” or MOC review tool for more experienced pathologists.

Features:
- Presents the key entities and diagnoses that pathologists will see in practice
- Emphasis is on basic morphology with newer techniques represented where they are frequently used
- Includes “expert tips” from experienced diagnosticians

Publication Year: 2013
Edition: 1st Ed
