Neuroradiology: A Core Review

Designed specifically for the Core Exam, Neuroradiology: A Core Review covers all key aspects of neuroradiology, mimicking the image-rich, multiple-choice format of the actual test. Ideal for residents preparing for the Core Examination, as well as practitioners taking recertification exams, this unique review follows the structure and content of what you’ll encounter on the test, effectively preparing you for Core Exam success!

The book consists of 4 sections that are tested on the ABR Core Exam and include Brain, Spine, Head and Neck and Pediatric Neuroradiology. Each section consists of five (5) chapters: Congenital, Trauma, Infections/Inflammatory/Demyelination/Dysmyelination, Tumors and Vascular. High quality radiographs, CT, MRI, and ultrasound images will be included.

Answers to the questions are discussed in a concise manner with explanations for why a particular answer choice is correct and the remaining answer choices are incorrect. Literature references will be provided for each answer explanation, so a reader will know where to go for further reading on.

Key features:
- 1st neuroradiology review book geared to prep for the new ABR exam
- Answers to the questions discussed in a concise manner with explanations for why a particular answer choice is correct and the remaining answer choices are incorrect
- High-quality radiographs, CT, MRI, and ultrasound images included
