Biocontrol Agents: Entomopathogenic and Slug Parasitic Nematodes

Describes entomopathogenic and slug parasitic nematodes as potential biocontrol agents in crop insect and slug pest management.

Addressing research on these two nematodes from tropical, subtropical and temperate countries, it covers the new techniques and major developments regarding mass production, formulation, application, commercialization and safety measures. Plans for future strategies to make these beneficial nematodes cost-effective and expand their use by including them in integrated pest management programmes in different agro-ecosystems are also discussed.

The book provides a comprehensive review of the topic and is an essential resource for researchers, industry practitioners and advanced students in the fields of biological control and integrated pest management.

Publication Year: 2017
Edition: 1st Ed.
Author/Editor: Abd-Elgawad, Mahfouz M. M.; Askary, Tariq Hassan; Coupland, James
Publisher: CAB International
ISBN: 978-1-786-39000-4
Platform: Ovid
Product Type: Book
Speciality: Entomology, Molecular Biology
Language: English
Pages: 662
Illustrations: 0
