This focused compilation is ideal for when you're researching a case, seeking expert opinion, or looking to avoid pitfalls.

ICL Hip 2 combines current, clinically relevant lectures on diagnoses and management of hip disorders from five past AAOS annual meetings.

These selected lectures give you experience-based solutions and powerful insights on how to solve your toughest cases. The editors provide a textbook-type review of a variety of topics, relating them to your everyday clinical practice. This compilation offers hands-on surgical and nonsurgical solutions. It's a must-have for general orthopaedic surgeons, specialists looking to update their knowledge, and trauma fellows and residents alike.
