The updated Pediatric Ophthalmology volume features new chapters on optic nerve abnormalities and new photos!

Developed at Philadelphia’s world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

**The updated Pediatric Ophthalmology volume includes:**

Authoritative information on the clinical findings and the most recent treatment available for a wide spectrum of childhood ocular diseases, ideal for practicing ophthalmologists, pediatric ophthalmologists, fellows, and residents. New chapters on pediatric uveitis and pediatric optic nerve abnormalities. More than 170 new and updated high-quality photographs of specific disease entities and ocular disorders.

An easy-to-use format that covers Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.
