This evidence-based text delivers the full scope of knowledge necessary for novice and experienced faculty to become competent teachers in nursing. The only book to focus on the full academic role, it encompasses all of the key concepts required for effective teaching, curriculum development, evaluation and testing, becoming a scholar in nursing education, and much more.

The second edition is updated throughout and includes four new chapters on Understanding the Learner, Interprofessional Education, Curriculum Models, and Global Nursing Education. It offers new content on role of the nurse educator, learning theories, active learning, flipped class/team-based learning, teaching strategies, teaching in an online nursing course, using new technologies and simulation, clinical teaching and evaluation, test construction, scholarship of teaching, and more.

Chapters begin with objectives and conclude with a content summary. Each chapter integrates research and evidence into the text and includes specific examples of the methods and strategies presented, and ‘How-to Tips’ for readers.
