This classic book provides a straightforward approach to the diagnosis and management of the dizzy patient.

The purpose of this thoroughly revised and updated edition is to provide a framework for understanding the pathophysiology of diseases involving the vestibular system. The revision includes a systematic evaluation of the dizzy patient, diagnosis and management of common neurotological disorders, and a new section on symptomatic management of vertigo.

Features:
- Up-to-date review of the peripheral and central vestibular systems with latest references
- New bedside tests of vestibular function
- Review of latest treatment maneuvers for benign paroxysmal positional vertigo
- New chapters on: laboratory diagnosis of vestibular dysfunction; migraine; immune-mediated disorders; inherited disorders; symptomatic treatment of vertigo; antiemetic and antivertigo drugs; and vestibular rehabilitation
