Gynecologic Cancer

With contributions from experts across the U.S., Gynecologic Cancer details the current management of different types of gynecologic cancer.

Today the management of gynecologic cancers is multidisciplinary in nature, requiring close collaboration between gynecologic oncologists, medical oncologists, and radiation oncologists. Gynecologic Cancer reviews new therapies in use and under development for gynecologic cancer including novel radiation approaches, the role of chemotherapy and novel biologic agents, new and emerging surgical approaches, and the role of MRI in assessing tumor response in cervical cancer patients. It is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.

Publication Year: 2006
Edition: 1st
Author/Editor: Mundt, Arno; Yashar, Catherine; Mell, Loren; Thomas, Charles Jr
Publisher: Springer Publishing Company
Doody's Star Rating®: 83
