Forensic Nursing is based on the Standards of Forensic Nursing Practice developed by the International Association of Forensic Nursing.

Developed within a holistic, caring framework, and well grounded in theory and research, the second edition continues to provide a unique and comprehensive look at forensic nursing from an interdisciplinary perspective, and addresses the need for collaborative practice and skill in caring for victims of violence and disaster, as well as in competently assisting in investigations. New information has been included on human trafficking, sexual predators and the internet, and elder abuse.
