Developing the Reflective Healthcare Team

Rely on Ovid as the trusted solution that transforms research into results

Team working and learning through reflection are both fundamental to quality healthcare. This book is the first to explore the use of the practices of reflection to develop health care teams that can deliver sustainable, high-quality personalized care.

Developing the Reflective Healthcare Team is structured in three parts which are about new views of reflective practice, improving team working, and the use of the TA2LK facilitative reflective process to develop high performing teams.
