This new edition explores the intersection of scientific, creative, and spiritual ways of knowing that inform and inspire this “healing presence” in caregiver and patient.

At the center of professional nursing lies the “authentic presence” of the nurse -- the intention and commitment that brings us to the profession, and unfolds as we develop as nurses.

Revised, updated, and refocused, the book integrates traditional nursing practice with cutting-edge alternative and integrative medicine. The author expands our’ awareness of Allopathic and alternative ways of healing as rooted in Native Healing practices. The book also explores new models for transpersonal caring through the lens of philosophy, spirituality, and complexity science. It is a profoundly important resource for nurse educators, students, and practitioners.
