Designed for quick point-of-care reference, this guide covers every aspect of maternal-neonatal nursing in a concise format packed with bulleted facts, tables and illustrations.

Five distinctive sections cover Disorders, Diagnostic Tests, Treatments, Procedures, and Clinical Tools such as fetal growth and assessment parameters, estimated date of birth calculations, fundal height measurements, cervical dilation guides, drug protocols, postpartum assessment parameters, gestational age assessment, neonatal drug calculations, and neonatal weight conversions. Topics in each section are arranged alphabetically and follow a consistent format. Recurring icons highlight life-threatening disorders, interdisciplinary care, and illustrations of pathophysiology.

Publication Year: 2006  
Edition: 1st Ed.
