Developed especially for practicing nurses preparing for the certification examination offered by the American Nurses Credentialing Center (ANCC) provides a succinct, yet comprehensive review of the core material. This book has been organized to give the reviewer test taking strategies and techniques and sample test questions, which are intended to serve as an introduction to the testing arena. In addition, a bibliography is included for those who need a more in depth discussion of the subject matter in each chapter.

This latest edition has been completely revised and updated to reflect current guidelines and information from the latest version of the DSM IV-TR. The medications and use of medications has also been updated to reflect proper usage and doses.
