A truly comprehensive reference for the management of patients with endocrine cancer

The new edition has been fully revised and extended making it the most comprehensive and up-to-date reference available. Written and edited by leading international experts in the field, it sets the standard in multidisciplinary care for patients with endocrine tumors.

This authoritative and practical text is an invaluable resource for all those working in the field, including endocrinologists, medical oncologists, surgeons, radiation therapists, interventional radiologists, specialist nurses, and clinical scientists.

The book provides specific and detailed guidance on the basic, clinical, investigative and therapeutic processes required for the thorough evaluation of a patient with a tumor in an endocrine organ. The eighty-four chapters are arranged in seven parts:
