Inherited bleeding disorders have an adverse effect on the quality of life of afflicted women. Management of these women and their conditions is challenging and close collaboration between professionals in different specialities is needed. International experts and leaders of clinical research including haematologists, obstetrician-gynaecologists, an anaesthetist and those involved in patient advocacy show you how in this practical guide for clinicians.

This book includes recent advances in the field and explores areas for future research. The women's perspective and the efforts of advocacy groups are also discussed in the final chapter. These features make this book a unique, comprehensive and multi-disciplinary resource. It covers the gynaecological and obstetric issues for:
