This set of two evidence-based practice (EBP) tools from the Joanna Briggs Institute (JBI) is designed to help healthcare practitioners and managers learn how to review and assess research evidence and implement patient care based on that evidence.

The bundle includes the following tools (please note that they are not available individually):

- JBI SUMARI (System for the Unified Management of the Assessment and Review of Information) - Learn to develop, conduct and report on systematic reviews of evidence related to the feasibility, appropriateness, meaningfulness and effectiveness of healthcare interventions or professional activities.

- JBI TAP (Thematic Analysis Program) - Helps researchers in small-scale qualitative studies execution to extract qualitative data, categorize extractions, and organize categories thematically.

The Joanna Briggs Institute (JBI) is widely regarded as one of the world’s leading providers of evidence-based information from across the globe, as well as tools to help healthcare professionals implement an effective evidence-based practice program and provide the best possible patient care.
