Do you own the 2016 LWW Doody's Core Title Collection? Upgrade to the 2017 version!

Doody's Core Titles™ have been selected by academically-affiliated healthcare professionals and medical librarians, and are considered must-have resources for practitioners, researchers, and students.

A Core Title is a book that represents essential knowledge needed by professionals or students in a given discipline. Up to three librarians score each title on a score of 0-3 in five fundamental collection development criteria: authoritativeness of author and publisher; scope and coverage of the subject matter; quality of content (including timeliness); usefulness and purpose; and value of money. Scores are averaged to provide an overall score for each title. In this collection, thirteen of the Core Titles have been designated Doody's Essential Purchases, must-have titles for any sized institution.

Doody’s Review Service™ is a leading source for expert, authoritative quality assessment and collection development tools for medical, nursing, and allied health books.

Publisher
Lippincott Williams & Wilkins (LWW)
