This package includes 22 books from People's Medical Publishing House, USA - a division of one of China’s premier medical publishers - that have been recommended by medical librarians and medical content specialists with Doody’s Review Service™, a medical book quality assessment service.

This comprehensive collection, spanning a range of medical specialties, is a great way for medical libraries—especially institutions with limited budgets—to quickly expand their e-resource collection with some of medicine’s most well-known books.

Each title has been given a 4- or 5 Doody's Star Rating®, signifying exceptional quality, and/or has been designated a Doody’s Core Title™. Doody’s Core Titles have been selected by academically affiliated healthcare professionals and medical librarians, and are considered must-have resources for practitioners, researchers, and students.
