This package includes more than 35 books from Jones and Bartlett that have been recommended by medical librarians and medical content specialists with Doody's Review Service, a medical book quality assessment service.

This comprehensive collection, spanning a range of medical specialties, is a great way for medical libraries - especially institutions with limited budgets - to quickly expand their e-resource collection with some of medicine's most well-known books.

Each title has been published since 2011 and given a 3-, 4- or 5 Doody's Star Rating®, signifying exceptional quality, and/or has been designated a Doody's Core Title. Doody's Core Titles have been selected by academically affiliated healthcare professionals and medical librarians, and are considered must-have resources for practitioners, researchers, and students.
