A convenient and cost-effective package of nearly 100 titles in environmental science, ecology, and related scientific disciplines.

CABI is one of the world’s leading sources of full-text scholarly literature in agriculture, public health, and food and environmental science.

The CABI Environmental Science Book Collection includes nearly 100 books in water and environmental land management, forestry, biodiversity, ecology, biology, and other critical focus areas. Please note that books in this collection are not available individually.

Titles include:
- Agricultural Technologies and Tropical Deforestation
- Agriculture and Intellectual Property Rights
- Agriculture, Hydrology and Water Quality
- Agrobiodiversity Management for Food Security: A Critical Review
- Air Pollution and the Forests of Developing and Rapidly Industrialising Countries
- Apples
- Applied Mycology
- Below-ground Interactions in Tropical Agroecosystems
- Beneficial Microorganisms in Agriculture, Food and the Environment: Safety Assessment and Regulation
- Biodiversity Loss and Conservation in Fragmented Forest Landscapes: The Forests of Montane Mexico and Temperate South America
- Biodiversity of West African Forests
- Biofuels: Production, Application and Development
- Biological Control in IPM Systems
- Biopesticides: Pest Management and Regulation
- Broadening the Genetic Base of Crop Production
- Case Studies in Ecotourism
- Cassava
- Chemical Pesticide Markets, Health Risks and Residues
- Citrus Genetics, Breeding and Biotechnology
- Citrus Mites: Identification, Bionomy and Control
- Climate Change and Crop Production
- Climate Change and Global Crop Productivity
- Climate Change in Contrasting River Basins
- Climate Change in Developing Countries
- Community-Based Water Law and Water Resource Management Reform in Developing Countries
- Competition and Succession in Pastures
- Conflict, Social Capital and Managing Natural Resources
- Conserving Land, Protecting Water. Comprehensive Assessment of Water Management in Agriculture Series 6
- Conserving Plant Genetic Diversity in Protected Area. Population Management of Crop Wild Relatives
- Criteria and Indicators for Sustainable Forest Management
- Crop Stress Management and Global Climate Change
- Crop-soil Simulation Models
- Cross-Sectoral Policy Developments in Forestry
Cycad Classification
Decentralization and the Social Economics of Development. Lessons from Kenya
Development with Identity
Diseases of Tropical Fruit Crops
Ecohydrology: Processes, Models and Case Studies
Ecology and Management of Giant Hogweed
Ecotourism and Conservation in the Americas. Ecotourism Series No. 7
Ecotourism Policy and Planning
Ecotourism Programme Planning
Environment and Livelihoods in Tropical Coastal Zones: Managing Agriculture-Fishery-Aquaculture Conflicts
Environmental Change and Geomorphic Hazards in Forests
Environmental Impact of Genetically Modified Crops
Environmental impact of invertebrates for biological control of arthropods: methods and risk assessment
Environmental Impacts of Ecotourism
Environmental Impacts of Pasture-based Farming
Environmental Impacts of Sugar Production
Environmental Policies for Agricultural Pollution Control
Environmental Risk Assessment of Genetically Modified Organisms, Volume 1: A Case Study of Bt Maize in Kenya
Environmental Risk Assessment of Genetically Modified Organisms, Volume 2 A Case Study of Bt Cotton in Brazil
Environmental Risk Assessment of Genetically Modified Organisms. Challenges and Opportunities with Bt Cotton in Vietnam, Vol. 4
Evaluating Indirect Ecological Effects of Biological Control
Farmers, Scientists and Plant Breeding
Field and Laboratory Methods for Grassland and Animal Production Research
Fluorides in the Environment
Food Security in Africa and Asia. Strategies for Small-scale Agricultural Development
Forest Biodiversity
Forest Genetics
Forest History
Forest Policy for Private Forestry
Forest Tourism and Recreation
Forestry and Climate Change
Forestry and Environmental Change
Forestry Budgets and Accounts
Forests and Landscapes
Forests and Society: Sustainability and Life Cycles of Forests in Human Landscapes
Forests at the Land-Atmosphere Interface
Forests in Sustainable Mountain Development
Freshwater Nematodes
Genetics, Evolution and Biological Control
GIS and Spatial Analysis in Veterinary Science
Global Pesticide Resistance in Arthropods
Global Rangelands
Good Statistical Practice for Natural Resources Research
Grassland Ecophysiology and Grazing Ecology
