Get convenient, cost-effective access to 15 core books ideal for the SLH student and practitioner. Also included are over 235 video clips that cover fluency, audiology, voice, neuroscience, and anatomy and physiology. Books and clips are all available via a discipline-specific online portal at LWWHealthLibrary.com

Features:
- 15 authoritative, must-have references from one of the world’s leading health sciences publisher
- More than 235 video clips
- Key titles include:
  - Guitar: Stuttering; Bhatnagar: Neuroscience for the Study of Communicative Disorder
  - Katz: Handbook of Audiology

Please note we always add new editions as soon they are published. That means multiple editions of a book may be available. Books in this collection include the following (be sure to visit Health Library: User Central for the most up-to-date list):
- Audiology and Communication Disorders: An Overview
- Auditory Evoked Potentials: Basic Principles and Clinical Application
- Clinical Management of Articulatory and Phonologic Disorders
- Handbook of Clinical Audiology
- Hearing Science
- Language Intervention Strategies in Aphasia and Related Neurogenic Communication Disorders
- Neuroscience for the Study of Communicative Disorders
- Neuroscience for the Study of Communicative Disorders
- Rehabilitative Audiology: Children and Adults
- Speech Science Primer: Physiology, Acoustics, and Perception of Speech
- Speech Sound Disorders, 1e
- Stuttering: An Integrated Approach to Its Nature and Treatment
- Terminology of Communication Disorders: Speech-Language-Hearing
- Treatment of Stuttering: Established and Emerging Interventions
- Understanding Voice Problems: A Physiological Perspective for Diagnosis and Treatment
