PSYNDEX is the most comprehensive abstract database (not full-text) of psychological literature, audiovisual media, intervention programs, and tests from German-speaking countries.

PSYNDEX contains two database segments: PSYNDEX Literature and Audiovisual Media with records of psychological publications from authors in the German-speaking countries, audiovisual media, and extensive descriptions of intervention programs; PSYNDEX Tests with descriptions of tests in use in the German-speaking countries.

Approximately 30% of the records are in English or have English abstracts. All records have English title translations, descriptors, classification categories, and key concepts (literature and audiovisual media records only); the database is searchable in German and English.

Subject Coverage: Literature & Audiovisual Media: Psychology, including aspects of psychiatry, medicine, education, sociology, sport, linguistics, business management, criminology relevant for psychology. Tests: Psychology, education
