The Environmental Science Database provides access to international scientific literature relating to all aspects of environmental quality, monitoring, resource management and conservation.

Compiled by subject specialists at CABI Publishing, the Environmental Science Database contains more than 2,000,000 abstracts and citations, with 100,000 records added annually. It provides a fully searchable backfile to 1973 of research from over 75 countries and provides an ideal source for academics, researchers, consultants and others interested in the environmental aspects of agriculture, forestry, food, and rural development.
