Indexed research literature unequalled in its coverage of the international geoscience literature: earth sciences, ecology, geology, human and physical geography, environmental sciences, oceanography, geomechanics, alternative energy sources, pollution, waste management and nature conservation.

Contentrosses subject, language and cultural boundaries, providing a unique research tool to users. GEOBASE covers over 3 million abstract records of multidisciplinary content enabling comprehensive geological evaluation of any desired region. This includes geological structure and relation to natural resources as well as linking resource management, transport, and regional and urban planning.

Content:
- Over 3 million records
- Over 2 million journal articles
- 70,000 conference papers
- 3,000 monograph chapters
- 200,000 records added annually

Publisher: Elsevier
Platform: Ovid
Product Type: Database
Speciality: Aquatic Sciences, Ecology, Geography, Geology & Geosciences
Language: English
Frequency: Quarterly
Coverage: 1980 - Present
Number of Records: 3 million+
Records Added Annually: 200,000
