## Ophthalmic and Physiological Optics

Rely on Ovid as the trusted solution that transforms research into results

The Journal of the College of Optometrists

Ophthalmic and Physiological Optics considers papers relevant to the practice and application of optometry and the basic aspects of visual science and clinical and applied matters. The practice of optometry and its related instrumentation are major components of the Journal, with topics ranging from the design of spectacle and contact lenses to ocular disease and the use of drugs.

Articles considered for the Journal may be experimental, observational, theoretical or historical in nature. While emphasis is given to matters of importance to optometrists, many of the topics discussed are of interest to: Ophthalmologists, Vision scientists, Visual psychologists, Physiologists, Physicists, and Neuroscientists.

Anyone concerned with the development, use and restoration of vision.

Emphasis is also given to problems in applied vision in such situations as driving, optical instrumentation and visual displays.

Impact Factor	2.262
ISI JCR Ranking	22/59 (OPHTHALMOLOGY)
Author/Editor	David Elliott
Publisher	Wiley
ISSN	0275-5408
Platform	OvidMD, Ovid
Product Type	Journal
Speciality	Ophthalmology
Language	English
Frequency	Bi-Monthly
Coverage	January 2001 - Present
PDF Coverage	January 2001 - Present
