

Ovid®

Vascular and Endovascular Surgery

Rely on Ovid as the trusted solution that transforms research into results

A peer-reviewed journal that publishes information to guide vascular specialists in endovascular, surgical, and medical treatment of vascular disease.

The journal offers original scientific articles on vascular intervention, including the new endovascular therapies for peripheral artery, aneurysm, carotid, and venous conditions; as well as special interest topics presented in the format of Case Reports, Clinical Controversy discussions of disputed issues, comprehensive Basic Science reviews, a Endovascular Techniques section, and a Vascular Medicine section. Vascular and Endovascular Surgery addresses the spectrum of arterial, venous, and lymphatic disease and provides factual information that will expand your clinical perspective and treatment skills. The multidisciplinary approach to the vascular patient is emphasized with options of open surgical repair, endovascular intervention, and medical therapy discussed in each issue.
