This official journal of the American Academy of Neurology is the premier peer-reviewed journal for experts in the fields of Neuroimmunology and Neuroinflammation.

The journal provide neurologists with peer-reviewed articles, editorials, and reviews to enhance patient care, education, and clinical & translational research.

Neurology: Neuroimmunology & NeuroInflammation publishes open-access online reports of original research and in-depth reviews of topics in multiple sclerosis, NMO, Guillain-Barré, myasthenia and inflammatory muscle disease; related reports focused on nervous system infection are also featured. Peer-reviewed categories include full-length articles, Clinical/Scientific Notes, and Views & Reviews. Letters and Editorials highlight the discussion related to current content.
