The definitive journal for scientists, clinicians, and trainees in the field of oncology worldwide - now complementary for JAMA subscribers!

The journal's original, innovative, and timely scientific and educational content provides a deeper understanding of cancer pathogenesis and recent treatment advances for readers.

It aims to effectively convey the findings of important clinical research, major scientific breakthroughs, actionable discoveries, and state-of-the-art treatment pathways to the oncology community. Its goal is that successful communication of new knowledge will ultimately translate to clinical benefit for people living with and surviving cancer.
