Psychopharm Review - Archive

Rely on Ovid as the trusted solution that transforms research into results

Psychopharm Review is a monthly newsletter that provides timely reports in psychopharmacology and therapeutic neuromodulation.

Bring the most current pharmacologic, device-based, and psychotherapeutic interventions to the expert management of your practice. Psychopharm Review offers the most essential, practical advice for recognizing and treating virtually all types of psychiatric disorders.

With Psychopharm Review you will:

- * Make well-informed decisions to address neurocognitive effects of medications in elderly patients, treatment of bipolar disorder, and the hazards of inappropriately prescribed medications.
- * Stay current on neuromodulation therapies such as vagus nerve stimulation (VNS), transcranial magnetic stimulation (TMS), and deep brain stimulation (DBS).
- * Fully understand the key issues that can affect your patients' mental health, how to achieve more consistent treatment adherence, and how to approach ethical issues surrounding various therapies.
- * Receive critical reviews of groundbreaking medication trials, such as CATIE and STAR*D.

Psychopharm Review understands the demands of daily practice and provides you with practical treatment strategies.

Please note that while this journal ceased publication in 2014, archives are available for purchase and the closed frontfile is available in collections only.
