## Journal of Neurology, Neurosurgery, &amp; Psychiatry

Rely on Ovid as the trusted solution that transforms research into results

Important papers covering the whole field of clinical neurological practice.

The Journal of Neurology, Neurosurgery, & Psychiatry focuses on clinical neurology, neurosurgery, neuropsychology, neuropsychiatry and closely related experimental work. The journal features full-length scientific papers, short reports, letters and reviews of neurological investigations. Each issue also presents an editorial concerning a recent advance or an area of controversy in these fields.

Emphasis is given to common disorders such as cerebrovascular disease, multiple sclerosis, Parkinson's disease, peripheral neuropathy, epilepsy, subarachnoid haemorrhage, including papers concerning pathogenesis and treatment.

Included with this journal subscription is the educational supplement Neurology in Practice. Published four times per year, its articles are designed to fill the gap between the knowledge available from textbooks and journal articles and its implementation in everyday clinical practice. Articles are commissioned from leading international experts.

Subscribers to JNNP also have access to Practical Neurology and the Journal of NeuroInterventional Surgery and archive of Practical Neurology.

Impact Factor	7.144
ISI JCR Ranking	4/200 (SURGERY), 8/142 (PSYCHIATRY), 15/197 (CLINICAL NEUROLOGY)
Author/Editor	Kiernan, Matthew C.
Publisher	BMJ Publishing Group
ISSN	0022-3050
Platform	OvidMD, Ovid
Product Type	Journal
Speciality	Neurology Neurosurgery Psychiatry Surgery
Language	English
Frequency	Monthly
Coverage	January 1995 - Present
PDF Coverage	September 2000 - Present
