Contact Dermatitis

Rely on Ovid as the trusted solution that transforms research into results

Designed primarily as a journal for clinicians who are interested in various aspects of environmental dermatitis. This includes both allergic and irritant (toxic) types of contact dermatitis, occupational (industrial) dermatitis and consumers' dermatitis from such products as cosmetics and toiletries.

The journal aims at promoting and maintaining communication among dermatologists, industrial physicians, allergists and clinical immunologists, as well as chemists and research workers involved in industry and the production of consumer goods. Papers are invited on clinical observations, diagnosis and methods of investigation of patients, therapeutic measures, organisation and legislation relating to the control of occupational and consumers' contact dermatitis, preventive measures and educational advice.

Papers concerned with the immunology of allergic contact dermatitis are invited for the purpose of bringing to the notice of the clinician, knowledge of important recent advances in the understanding of its theoretical basis, as well as papers on the physiology and pathology of the horny layer and epidermis in relation to its disturbance in the genesis of irritant dermatitis. A major section is devoted to Short Communications for the presentation of information on new contact allergens and dermatitic chemicals or other substances.

Impact Factor	4.275
ISI JCR Ranking	7/27 (ALLERGY), 8/63 (DERMATOLOGY)
Author/Editor	Wolfgang Uter
Publisher	Wiley
ISSN	0105-1873
Platform	OvidMD, Ovid
Product Type	Journal
Speciality	Allergy & Immunology Dermatology
Language	English
Frequency	Monthly
Coverage	January 1996 - Present
