Journal of Cutaneous Pathology publishes manuscripts relevant to diseases of the skin in a broad sense, with the aims of advancing scientific knowledge regarding dermatopathology and enhancing the communication between clinical practitioners and research scientists. Original scientific manuscripts on diagnostic and experimental cutaneous pathology are invited. Clinicopathologic studies will be given high priority. Manuscripts based on light and electron microscopy, histochemistry, microbiology, biochemistry, immunology, pharmacology, tissue culture, embryology, molecular biology, and genetics are welcome, provided they advance the science of cutaneous pathology. Publication time will be kept as short as possible, ensuring that articles will be quickly available to all interested in this speciality.
