Anesthesia & Analgesia

The official journal of the International Anesthesia Research Society is the "Gold Standard in Anesthesiology," and provides the practice-oriented, clinical research to keep current and provide optimal care to patients. Available only as part of a collection.

Each monthly issue features peer-reviewed articles on the latest advances in drugs, preoperative preparation, patient monitoring, pain management, pathophysiology, and many other timely topics.

The journal exists for the benefit of current and future patients under the care of health care professionals engaged in the disciplines broadly related to anesthesiology: perioperative medicine, critical care, and pain management. It furthers the care of these patients by reporting the fundamental advances in the sciences of these clinical disciplines and by documenting the clinical, administrative, and educational advances that guide therapy.
