Melanoma Research is a journal for basic, translational and clinical research in melanoma.

Melanoma Research is a well established international forum for the dissemination of new findings relating to melanoma. The aim of the journal is to promote the level of informational exchange between those engaged in the field.

Melanoma Research aims to encourage an informed and balanced view of experimental and clinical research and extend and stimulate communication and exchange of knowledge between investigators with differing areas of expertise. This will foster the development of translational research.

Melanoma Research seeks to present a coherent and up-to-date account of all aspects of investigations pertinent to melanoma. Consequently the scope of the journal is broad, embracing the entire range of studies from fundamental and applied research in such subject areas as genetics, molecular biology, biochemistry, cell biology, photobiology, pathology, immunology, and advances in clinical oncology influencing the prevention, diagnosis and treatment of melanoma.

Impact Factor
3.135

ISI JCR Ranking
115/222 (ONCOLOGY), 56/133 (MEDICINE, RESEARCH & EXPERIMENTAL), 11/63 (DERMATOLOGY)

Author/Editor
Lejeune, FJ; Storkus, WJ

Publisher
Lippincott Williams & Wilkins (LWW)

ISSN
0960-8931

Platform
