The Journal of Cardiopulmonary Rehabilitation and Prevention, the official journal of the American Association of Cardiovascular and Pulmonary Rehabilitation and the Canadian Association of Cardiac Rehabilitation, is the only professional journal for cardiovascular and pulmonary rehabilitation specialists.

Dedicated to the improvement of multi-disciplinary clinical practice, the journal provides high quality, current information to practitioners in the field. Original, peer-reviewed manuscripts cover all aspects of cardiac, peripheral vascular, and pulmonary rehabilitation. Editorial features include case reports, roundtables, regular nutrition updates, pharmacological reimbursement and management updates, media reviews, and abstract summaries of current literature.
