For more than 60 years Plastic and Reconstructive Surgery®, as the official journal of the American Society of Plastic Surgeons, has been the one consistently excellent reference for every specialist who uses plastic surgery techniques or works in conjunction with a plastic surgeon.

Plastic and Reconstructive Surgery® brings subscribers up-to-the-minute reports on the latest techniques and follow-up for all areas of plastic and reconstructive surgery, including breast reconstruction, experimental studies, maxillofacial reconstruction, hand and microsurgery, burn repair, cosmetic surgery, as well as news on medicolegal issues. The cosmetic section provides expanded coverage on new procedures and techniques and offers more cosmetic-specific content than any other journal.

The goal of Plastic and Reconstructive Surgery® is to inform readers about significant developments in all areas related to reconstructive and cosmetic surgery. Significant papers on any aspect of plastic surgery—original clinical or laboratory research, operative procedures, comprehensive reviews, cosmetic surgery—as well as selected ideas and innovations, letters, case reports and announcements of educational courses, meetings, and symposia are invited for publication. Plastic and Reconstructive Surgery is a monthly, peer-review publication dedicated to chronicling the present and laying the experimental and clinical foundations for future advances in clinical plastic and reconstructive surgery. It is the premier on-line source for monthly, peer-reviewed articles on plastic and reconstructive surgery.
