The Journal of Geriatric Physical Therapy (JGPT), the official journal of the Academy of Geriatric Physical Therapy, is a peer-reviewed journal and leading source of clinically applicable evidence for achieving optimal health, wellness, mobility, and physical function for aging adults, across the continuum of health care settings.

Journal of Geriatric Physical Therapy is the leading source of clinically applicable evidence for achieving optimal health, wellness, mobility, and physical function across the continuum of health status for the aging adult.

JGPT focuses on key areas of interest and professional development for physical therapy professionals working to improve quality of life for older adults, by promoting healthy lifestyle, disease prevention, and return to function through physical therapy intervention. The Journal provides information primarily to physical therapists, physical therapist assistants, physical therapy students, as well as to other health professionals involved in the care of aging adults in a variety of practice and community settings. The JGPT will be of interest to professional colleagues from fields including nursing, medicine, occupational therapy, speech and language pathology, geriatric care management, social work, and orthotics and prosthetics. The JGPT can inform care in settings including community organizations and home health care agencies, cardiovascular/cardiopulmonary centers, orthopedic centers, comprehensive and subacute rehabilitation centers, assisted living facilities, continuing care retirement communities, hospital- and community-based outpatient facilities/clinics, ambulatory care centers, health and wellness facilities, sport and human performance centers, and academic institutions.
