Evidence-Based Gastroenterology Extended Archive

Instant access to issues spanning Volume 1, Issue 1 to issues published in 2008 of the first journal that helped clinicians sort through new research and clinical information and make patient care decisions based on the best current evidence.

The editorial board evaluates all of the latest developments by systematically searching a core group of more than 40 journals for each quarterly issue. Concise structured abstracts and editorial commentaries summarize on one page the most crucial points of key studies. Also included is a glossary containing statistical and epidemiologic definitions and calculations.
