Transboundary and Emerging Diseases

Rely on Ovid as the trusted solution that transforms research into results

Transboundary and Emerging Diseases brings together in one place the latest research on infectious animal diseases considered to hold the greatest economic threat to animals worldwide.

The journal provides a venue for global research on the sources favoring their diagnosis, prevention and management, and for papers on veterinary public health, pathogenesis, epidemiology, statistical modeling, diagnostics, biosecurity issues, genomics, vaccine development and rapid communication of new outbreaks. Papers include timely research approaches using state-of-the-art technologies. The editors encourage papers on socio-economic and environmental factors influencing the management of the bio-security threat posed by these diseases, including risk analysis modeling, as long as a science-based approach is adopted. Precedence is given to communications concentrating on novel science-based approaches to controlling transboundary and emerging diseases.

This international journal provides rapid publication of original papers, short communications, reviews, selected abstracts and outbreak alerts.

Impact Factor	3.504
ISI JCR Ranking	2/140 (VETERINARY SCIENCES), 25/88 (INFECTIOUS DISEASES)
Author/Editor	Paul Kitching; Marta Sabara; Gavin Thomson; Dirk Warling
Publisher	Wiley
ISSN	1865-1674
Platform	Ovid
Product Type	Journal
Speciality	Infectious Diseases Veterinary Science
Language	English
Frequency	6 Times a Year
Coverage	Vol 52 #1 (2005) - Present
PDF Coverage	Vol 52 #1 (2005) - Present
