

Ovid®

Clinical Implant Dentistry and Related Research

Rely on Ovid as the trusted solution that transforms research into results

Aims to advance the scientific and technical developments within clinical implant dentistry and related subjects

The journal addresses itself to clinicians, researchers, teachers and students using and/or studying osseointegrated implants in the oral & maxillofacial areas. The journal publishes original research and reviews on all clinical and basic science aspects of osseointegrated implants, bone biology, bone grafts and bone substitutes.
